Need help?

Team Venti clients can contact Support by submitting tickets through one of the following methods:

Team Venti Portal

The Team Venti Portal is your hub for:

- Accessing our knowledge base
- Staying updated on Microsoft announcements
- Opening and checking support tickets

To open a ticket:

- Go to 'Open a ticket'
- Fill in details like classification, priority, product and name

You can also check your ticket status after signing in. If you are new, sign up using the 'Sign-Up' button at the top right.

Support E-mail Address

You can also submit tickets via email at **support@teamventi.com**. This method is faster but automatically sets your ticket priority to low. Submitting by email also creates a Portal account for you, with an activation invitation sent to your inbox.

Phone Support

For direct assistance call our main line at **512-380-1888**. A support ticket will be created during your call and you will get an email confirmation with your ticket number.

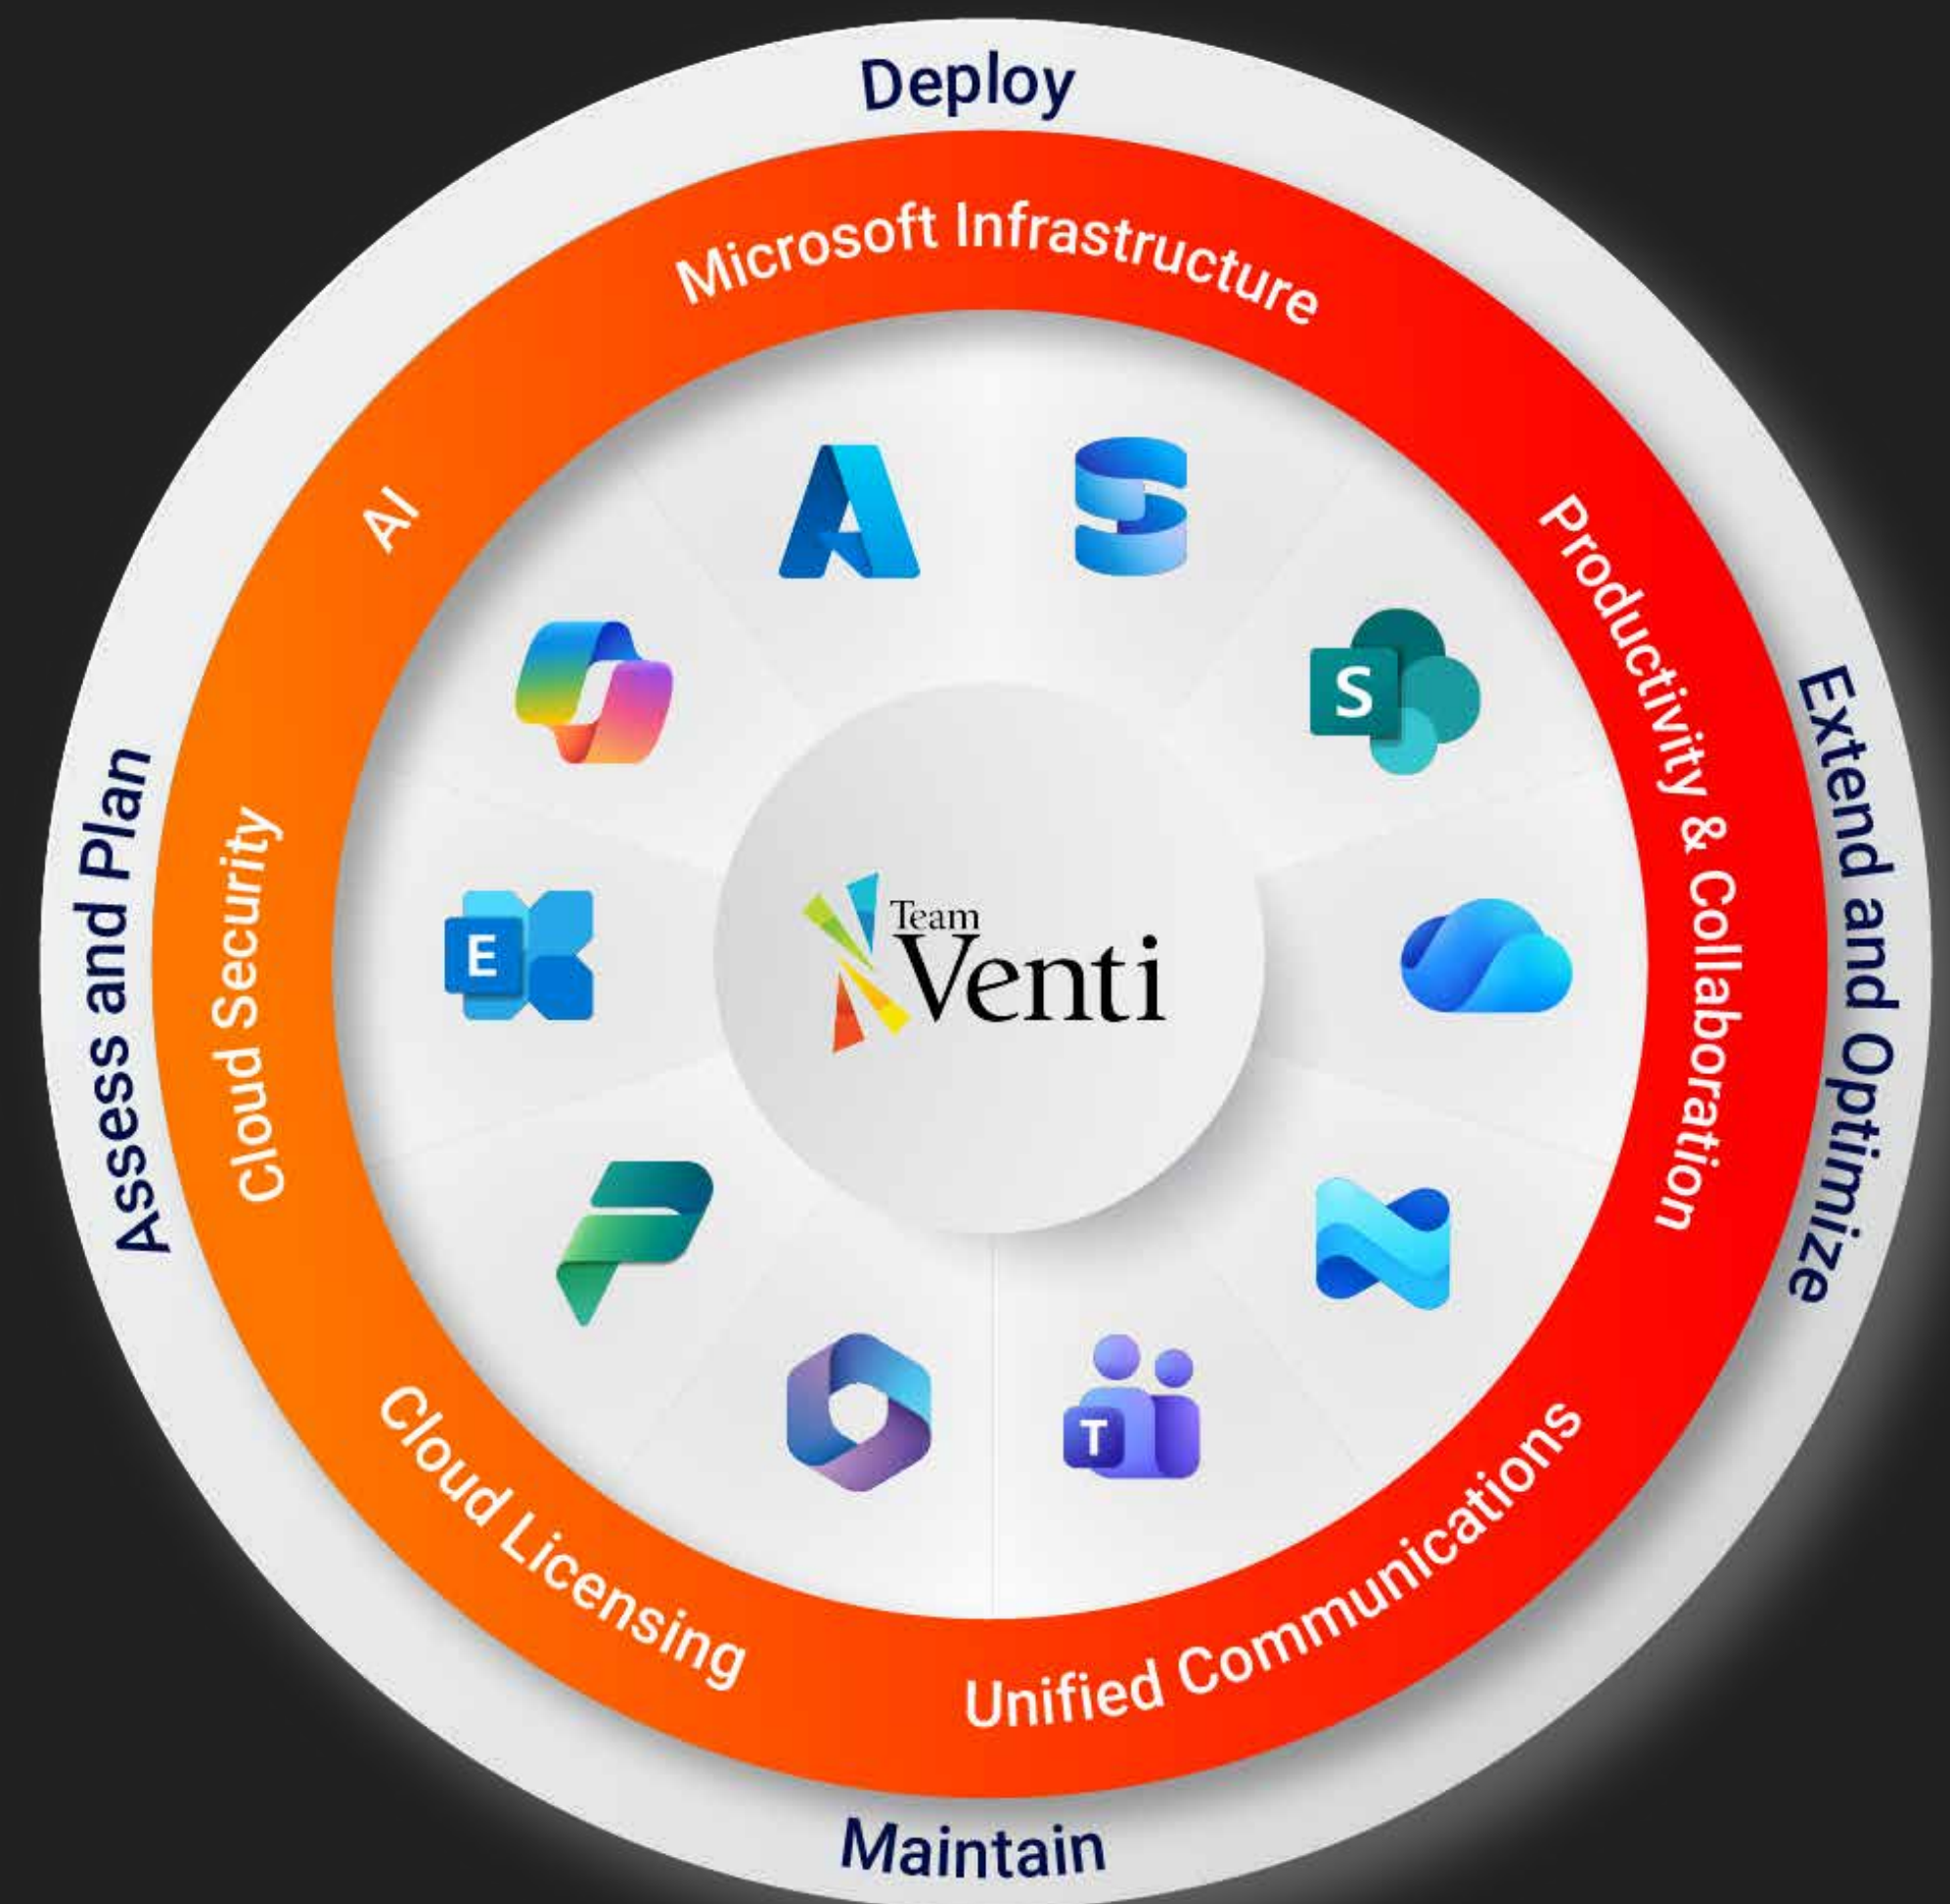

Chat

For instant help, use the **WebChat applet** located at the bottom-right of Team Venti, Team Venti Portal, and Support Portal websites. Every chat automatically generates a ticket, and you'll get a transcript and ticket notification via email. Feel free to reply to the ticket notification to follow up on your conversation.

Your business partner in all things Microsoft

As your Certified Microsoft Gold Partner, our goal is to give you the best service, and thus, we are committed to drive your organization's continuous optimization with next generation Microsoft technologies, while simplifying IT planning, deployment, and support.

Scale your business, while controlling IT costs, harnessing the power of cloud computing, and accelerating your data center transformation safely and effectively through diverse Microsoft technologies and solutions. In addition, we can assist you by enabling employees and teams to do their best work with advanced productivity and teamwork tools, while protecting assets and information.

Microsoft Infrastructure

Azure

Succeed in your Microsoft Cloud projects with Team Venti's expertise and Microsoft's best practices for Azure, regardless of where you stand in your IT journey.

Deploy data resources that handle vast amounts of data securely and reliably. With our Azure services, you may store and back up data via a multi-layered security infrastructure.

Our services consist of:

- Azure cloud migration services
- Cloud storage, backup, and recovery
- Microsoft Azure cloud infrastructure
- Applications hosting
- Identity management
- Azure SQL analysis and modernization
- Managed Microsoft Azure services

Exchange

Operate world-class Microsoft Exchange environments without data loss or business interruption with our services.

Let us manage, administrate, migrate, and secure your organization's email in a zero-interruption, effective way. Whether on-premises, hybrid, or in the cloud, our experts can help you.

Our services consist of:

- Professional services
- Packaged migration services
- Microsoft Exchange email security hardening
- Upgrade existing Exchange servers
- Email compliance

Systems Management

Streamline and modernize the management of your IT assets with Microsoft's next generation systems management tools.

Plan and deploy Microsoft Endpoint Configuration Manager and Intune with confidence, using our QuickStart deployment engagements, based on Microsoft best practices, allowing for scalability and further customization.

Our services consist of:

- Elastic infrastructure provisioning
- Launch cloud services and process automatically
- Enable easy application deployment
- Endpoint encryption
- Admin Microsoft Intune training

SQL Server

Make the most out of your investment with our consulting services that assess your SQL Server environment or a single SQL database to get the most out of your investment.

We can help your SQL environments avoid performance degradation, availability and capacity planning issues. We focus on reliability, security, administration, high availability, and disaster recovery.

Our services consist of:

- SQL Server health check
- Performance tuning
- High Availability and Disaster Recovery (HADR)
- SQL Server upgrades
- SQL Server security assessment
- Migration to Azure Cloud
- Training and coaching

On-Premises

Our team offers comprehensive support for your on-premises infrastructure to ensure optimal performance and security. Our services consist of:

- **Active Directory on premises:** Design, security audits, Group Policy management, support, and hybrid integrations with Azure AD.
- **Microsoft Hyper-V:** Consolidate physical servers and improve resource utilization. We offer support for virtualization strategy, high availability and performance optimization.
- **Windows Server:** Installation, patch management, robust backup and recovery solutions. Expert support for troubleshooting, migrations and upgrades.

Microsoft Intune Services

Overview

Team Venti's Intune services are designed to empower organizations with modern, cloud-first endpoint management & robust security. From planning and deploying to support and optimization, we are there for you every step of the way.

Assessment

Gain valuable insights into your Intune environment and adhere to Microsoft best practices with our comprehensive assessment. Identify gaps, optimize performance, and strengthen security.

Consulting

Simplify device and app management with the help of Intune experts. From Intune setup and configuration to Intune migrations and support.

Knowledge Transfer

Empowering your team with hands-on expertise through personalized knowledge transfer, enabling effective management and utilization of the Intune portal's capabilities.

Support

Dedicated assistance and troubleshooting for Microsoft Intune/Autopilot, ensuring uninterrupted functionality and quick issue resolution. Our expert Intune support services further empower you to optimize your MDM and MAM strategy for long-term success.

Optimization & Advisory

Validate and optimize Intune and Entra ID across Windows, iOS/iPadOS, macOS, and Android, fine-tuning compliance, security, apps, Autopilot, Defender for Endpoint, and Cloud Kerberos Trust via collaborative sessions for rapid cloud-first readiness. Benefits include unified security, compliance alignment, scalability for BYOD/hybrid setups, and efficiency gains like cost cuts and productivity boosts.

QuickStart

A structured, collaborative approach to rapidly implement Intune. Benefit from predictable costs and project outcomes through a series of 90-minute sessions. We provide recording access for seamless knowledge transfer.

MAM Deployment

Safeguard your organization's data with Microsoft Intune MAM and App Protection policies.

Licensing

Gain expert support and flexible licensing options that empower your organization to thrive by buying Intune licenses from a Microsoft CSP.

Windows Autopilot Deployment

Simplify the process of setting up new devices. Windows Autopilot is a powerful solution that automates the configuration and deployment of devices, reducing IT overhead and ensuring a consistent user experience.

Microsoft 365 Copilot

Experience the power of generative AI with Microsoft 365 Copilot. Team Venti helps organizations build a strong and secure AI foundation by modernizing your cloud, data, and applications. Empower your people for success in the AI-driven world.

Copilot Smart Rollout

We guide your Copilot implementation with a tailored approach. Our expertise helps you:

- **Assess your readiness:** Identify potential challenges/opportunities for optimization
- **Remediate roadblocks:** Address any barriers to successful Copilot adoption
- **Optimize your rollout:** Ensure a smooth & effective implementation across your organization

Copilot Custom Development

We help you unleash the full power of Copilot through:

- **Tailored Copilot experiences:** Develop custom solutions that address your unique needs
- **Enhanced productivity:** Empower your teams with AI-driven tools and workflows
- **Skill enhancement:** Develop and upskill your workforce with AI-powered capabilities
- **Unleashed creativity:** Foster innovation and creativity through AI-powered tools

Microsoft Copilot Services

Microsoft 365 Collaboration Services

Microsoft Teams

Professional IT services for all stages of your Microsoft Teams adoption journey. Microsoft Teams integrates all your communication, collaboration, voice, and business processes optimization needs into one easy-to-use platform.

Our services consist of:

- Define and design
- Governance planning
- Deployment
- Provisioning
- Admin and end-user training resources

OneDrive for Business

Deploy a core and meaningful OneDrive for Business environment with cost, deliverables, and schedule predictability. With powerful storage, your organization's files will be reachable at any moment; connecting teams and optimizing file sharing and collaboration.

Our services consist of:

- Governance planning
- Migration services
- Security hardening
- Backups
- Admin and end-user knowledge transfer

SharePoint

Build and manage secure and scalable online spaces for internal and external collaboration. Let your employees connect through a mobile, smart intranet. Share data, files, resources, while having a seamless workflow.

Our services consist of:

- Governance planning services
- Migration services
- Customization and integration

Microsoft 365 Migration

Deploy a Microsoft 365 environment ready for duty, leveraging our expertise and Microsoft's best practices.

Our services consist of:

- Migration planning and deployment
- Security hardening
- Maximization of your subscription
- Advanced data governance
- Audit Logs

Windows 11 Deployment

Enable secure end-user computing with an OS built for the modern world.

Our services consist of:

- Windows Hello for business
- Windows AutoPilot
- Professional Services
- Microsoft Intune services
- Windows patch management

Microsoft Digital Workplace

Empower your remote employees' productivity, securely, and with predictable outcomes regardless of their physical location.

Our services consist of:

- Device management (Intune)
- Microsoft 365 productivity apps
- Collaboration and communication via MS Teams
- Extend or replace your PBX/phone system
- Training and end user adoption
- Help desk support

Microsoft Power Platform

Maximize your efficiency and innovation within your business by unlocking the full potential of the Power Platform. We work closely with you to create a tailored Power App, design an insightful Power BI dashboard, and streamline your workflows using Power Automate.

Our services consist of:

- Design and define, deploy and configure your environment
- Microsoft Power Apps application development
- Microsoft Power BI dashboard design and development
- Microsoft Power Automate workflow set up

Other Productivity & Collaboration Services

A background image showing a business meeting in a modern office. A man in a suit is standing and presenting to a group of people seated at a table. One person is holding a colorful geometric folder. The office has exposed ductwork and a large window.

Customer experience tools for Microsoft Teams Voice

Teams
PowerPack
by Team Venti

Teams PowerPack – CDR

Track Teams calls by user including date, time, duration, caller number, and call type.

- **Capture inbound and outbound calls** by user, showing call time, duration, and type for clear visibility into Teams Voice usage.
- **Find the call details you need quickly.** Use intuitive filters to sort by user, call type, or timeframe.
- **Keep call records longer than Microsoft's standard 30 days.** View up to 90 days of historical data, with longer retention options available.

**Included with BlueSky UC Direct Routing services at no extra cost*

Teams PowerPack – Call Analytics

Access detailed Teams Voice analytics by auto attendant, call queue, or department with an easy-to-use dashboard and call flow reports.

- **Follow call patterns accross your organization.** Get a clear view of call volume and routing by user, queue, and auto attendant. Drill down into specific dates or teams to understand usage and identify gaps.
- **Get detailed call flows with context:** call type, duration, call status, and technical metrics that help uncover bottlenecks.
- **Set up recurring reports** that go straight to your team's inbox, so key stakeholders always stay updated without manual effort.
- **Keep call records longer than Microsoft's standard 30 days.** View up to 90 days of historical data, with longer retention options available.

Teams PowerPack – CX

Turn Teams Voice into a customer experience engine with real-time insights, wallboards and screen-pop customer information.

- See live call volume, team availability, and missed calls as they happen. **Spot gaps, catch issues early,** and adjust quickly from one dashboard.
- Get instant pop-ups with caller details pulled from your CRM or helpdesk systems to **respond faster and more personally.**
- Route calls based on availability, skillset, or priority. **High-value conversations reach the right team member.**
- Handle voicemail, callback requests, and even text messages **from the same system.**
- **Built with native Microsoft Teams technology,** like Azure Bot services and Microsoft-grade security.

BlueSky UC is a Team Venti brand with over a decade of experience delivering premium UCaaS solutions and professional services, fully focused on Microsoft enterprise voice.

Microsoft Teams Voice

Drive productive, intelligent, and secure communications via our premium BlueSky UC direct routing services. Update your old PBX with a modern, custom, steady, and reliable phone system to secure high-fidelity calls.

Our services consist of:

- Unified Communications as a Service (UCaaS)
- Microsoft Teams Enterprise Voice
- Voice migration projects
- Admin and end user Microsoft Teams training
- Device selection support and deployment
- Microsoft communications support

Call Recording

Record inbound or outbound company calls for regulatory, compliance, or quality management purposes. Having a way to analyze your calls is a way to gain insights for enhance customer service and optimizing whatever product or service you offer.

Our services consist of:

- General liability protection
- Clarity and support resolutions
- Training for quality management evaluation
- Analytics in calls and response times for user insights
- Improvement in your brand trust

Unified Communications

Security & Compliance

Microsoft Cloud Security

Safeguard your company's information without compromising end-user productivity. Through Microsoft Cloud Security, you are safeguarding your company IT's assets against malware or any type of cyber-attacks. As well as managing industry, government, and company compliance.

Our Cloud Security services consist of:

- Security define and design
- Identity and access management
- Cloud and on-premises security
- Device security and management
- Information protection
- Monitoring and alerts

Cloud Security Assessments

Identify potential risks that may have a huge impact on your environment in the future. By engaging with Team Venti's Cloud Security Assessments, you can expect us to identify vulnerabilities, and create a plan to mitigate the identified risks.

Our Cloud Security Assessments services consist of:

- Cybersecurity Risk assessment, to enhance your security posture through actionable insights
- Microsoft 365 Compliance Health Check, to monitor your M365 environment and create a path for optimization
- Threat and Vulnerability Assessment, by risk calculation and later on, through a recommended course of action

Compliance Gap Analysis

This service helps organizations use Microsoft technologies to meet major US cybersecurity frameworks like NIST, CMMC, HIPAA, FedRAMP, etc.

Our Compliance Gap Analysis services consist of:

- Comprehensive gap analysis report mapping your current state versus compliance requirements, complete with prioritized remediation actions
- Remediation implementation and configuration of policies that directly address each identified compliance gap
- Regular reporting and monitoring , intuitive dashboards for status and progress, and audit-ready documentation for continuous oversight

Cloud Licensing

Licensing Optimization

Team Venti's licensing optimization services empower organizations to maximize the value of their Microsoft investments. By conducting a comprehensive analysis of your current licensing usage, our experts identify potential cost-saving opportunities. We optimize your license portfolio to ensure you have the right licenses for your specific needs, while minimizing unnecessary expenses.

Our team leverages deep expertise in Microsoft licensing to provide tailored recommendations and strategic guidance. We help you navigate complex licensing scenarios, ensuring compliance with Microsoft's licensing terms and conditions.

Support & Management

Team Venti's licensing support and management services are designed to help businesses simplify their licensing processes, reduce costs, and ensure compliance. Our experts handle all aspects of Microsoft licensing, including:

- User provisioning and de-provisioning
- License assignment and optimization
- Ongoing support

We also offer a monthly per-user pricing model, which includes:

- Managed admin support
- Licensing management and optimization
- Assistance with organizational IT processes like onboarding and offboarding

Additional services include security features like:

- Secure Score reviews
- Microsoft 365 backups

Cloud Licensing

Microsoft Licensing Online Store

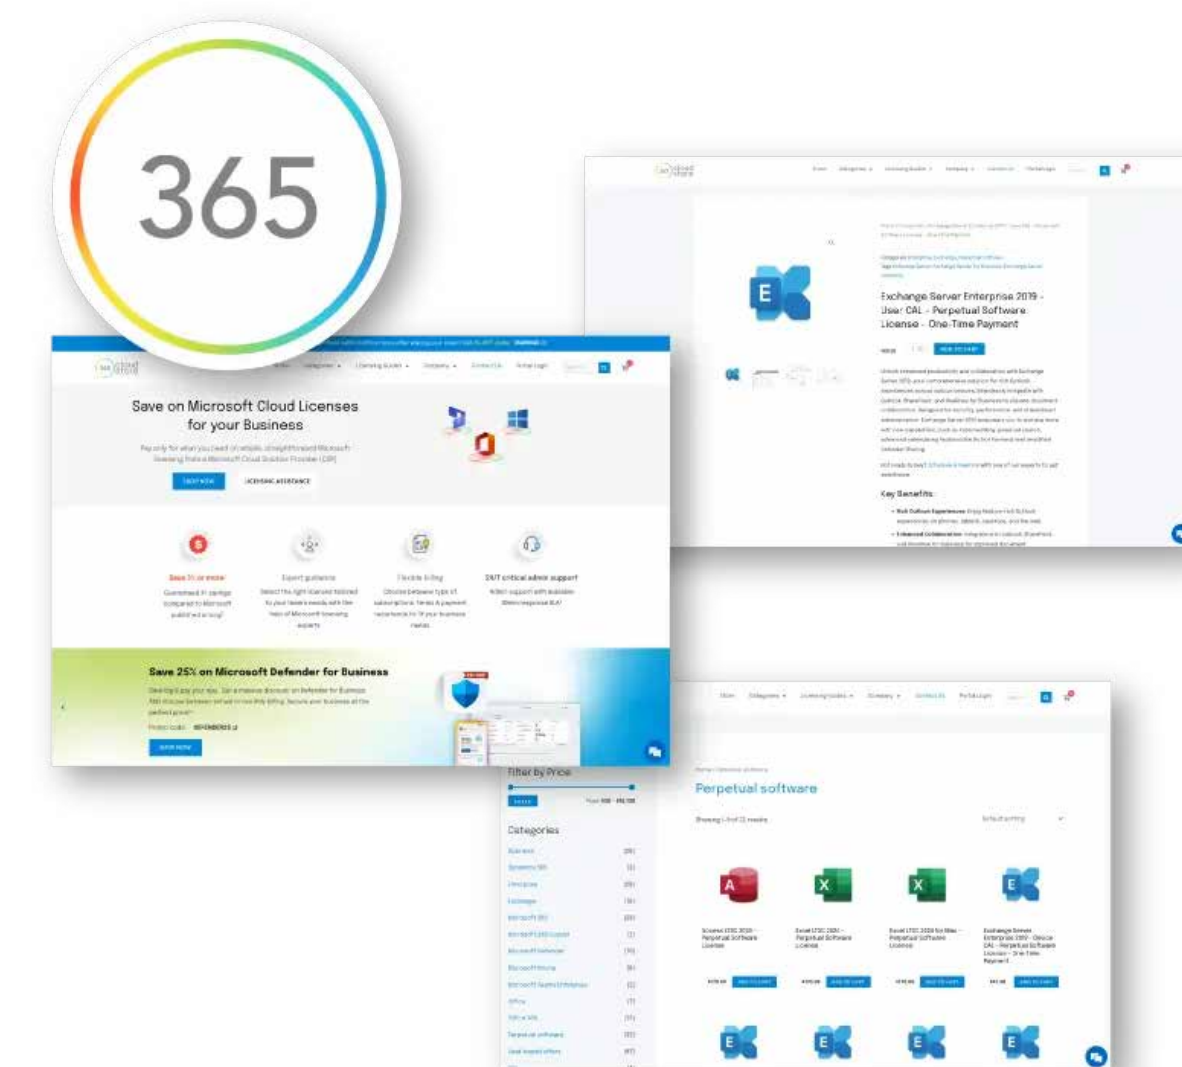

365 Cloud Store by Team Venti is your online destination for all things Microsoft licensing. As a Tier 1 Microsoft Cloud Solutions Provider (CSP), we make it easy for organizations to purchase and manage the Microsoft products they need to succeed. Our mission is to help clients boost productivity and build business value through smart licensing.

Why choose 365 Cloud Store:

- **Save 3% or more:** Guaranteed 3% savings compared to Microsoft published pricing¹
- **Expert guidance:** Select the right licenses tailored to your team's needs with the help of Microsoft licensing experts
- **Flexible billing:** Choose between type of subscriptions, terms and payment recurrence to fit your business needs
- **24/7 critical admin support:** Admin support with available 30min response SLA²

Terms and conditions

¹Applicable solely to Microsoft US commercial license subscriptions and excludes Government, Academic, or Nonprofit subscriptions. A minimum purchase of 5 licenses is required. Payment via ACH or bank wire is required. We ensure a minimum of 3% savings compared to Microsoft's published online list pricing upon meeting the aforementioned criteria. ²Custom response SLAs are available. Contact us for more information.
