

Buyback & Asset Recovery Program

At RackStar Networks, we keep things simple, smart, and straight-to-the-point. If you've got retired, excess, or decommissioned IT gear collecting dust, we'll turn it into real value fast. Our team has decades of combined experience working with AI firms, enterprises, service providers, data centers, and webscale operators, so you're in good hands from the first call to the final payout.

Our Mission

We're here to help you cut costs, clear space, and keep your IT lifecycle running efficiently. RackStar handles the heavy lifting asset cataloging, valuation, logistics, and resale, so your team can stay focused on actual projects, not piles of old gear. Whether it's active equipment, obsolete hardware, or something in between, we'll help turn it into budget power.

How It Works

1. Fair Market Valuation — No Guessing, No Games

We scan real-time global markets and reseller channels to give you a competitive, transparent offer. High-demand items can be quoted within 24 hours. Take the cash or roll it into new RackStar-sourced gear—whatever fits your roadmap.

2. Shipping Made Easy

Once you approve pricing, we handle the logistics. For Bay Area clients, we can pick up directly. Everywhere else, we cover shipping on our carrier accounts. Whether it's going across the street or across the globe, we make it smooth, fast, and hassle-free.

3. Testing, Verification & Fast Payment

Once your gear lands at our ESD-certified facility, we test, validate, and document everything. After confirmation, we send your payment via ACH, check, or wire usually within 24 hours. No drama, no delay.

Smart Shipping Tips

- Use double-walled boxes with 4–5 layers of bubble wrap or foam.
- Add at least 2 inches of padding on all sides.
- Place cards/blades in static-safe bags.
- Contact us before shipping anything over 75 lbs for palletization
- Individually wrap all items if boxing multiples.
- Include essentials: rack ears, power cords, console cables, rails
- Double-box factory-sealed gear (and don't cover OEM seals).
- Pallet shipments must be fully boxed, padded, and secured.

Why Teams Choose RackStar

- A refreshingly transparent, fast, and modern approach to IT asset recovery.
- We build long-term partnerships, not one-off transactions.
- Worldwide logistics support backed by real humans who actually respond.
- Pricing based on real-time data, not outdated spreadsheets.
- A reputation built on integrity, responsiveness, and follow-through.
- A simple way to reclaim budget while reducing your operational overhead.
