

Powering Your Network. Elevating Your Game.

May 2026

WHO WE ARE

Your tech partner for profit, cost, and risk management—aligning IT with business to help you work smarter, move faster, and grow stronger.

WHAT WE DO

Deliver high-performance new and used networking hardware and custom IT solutions—from asset recovery to lifecycle management—that keep your infrastructure agile, efficient, and cost-effective.

WHY WE DO IT

We make technology easy for you—simple, cost-effective, and tailored to your business needs. No fluff, just smart solutions that drive growth and optimize your spend.

HOW WE DO IT

With decades of experience and strong vendor partnerships, we provide the right gear at the right price—fast, flexible, and hassle-free. From hard-to-find parts to custom solutions.

Innovating for the Future

Vision

Identifying cutting edge network solutions, evaluating the direction of technology and identifying opportunities to provide our customers leading-edge solutions.

Focus

Wireless, high-end routing, switching, network design, low voltage cabling and integration services.

Ability

Offering both new and used solutions, offer a true best of breed solution that allows you to leverage your IT budget and maximize your return on investment.

Leadership Team

CEO

Scott Hobin

Visionary leader with two decades of expertise in driving IT innovation.

I take great pride in introducing the right technology to our clients while factoring their specific environmental needs and budgetary restraints into the equation.

I am vendor agnostic, customer centric!

President

Steve Robinson

Focused on strategic growth and customer relationships.

Meeting new clients and helping them solve their business challenges is what I enjoy most about this field. I've been blessed to work with many great clients over the years and enjoy the many unique folks I've had the privilege of working with.

Key Differentiators

- 50+ years of real-world networking experience
- Up to 85% off retail
- RackStar-certified, ready-to-ship leading-edge equipment from companies like Arista, Cisco, Juniper, Dell, HPE, Supermicro and more...
- Real people, real support—we show up, solve problems and forge long-term relationships
- Local, Silicon Valley facility to survey our equipment first-hand, and observe our advanced diagnostic testing process

Seamless Deployment

Site Readiness. Integration. Testing.

Every project includes a detailed Scope of to ensure deliverables are clearly defined and expectations are surpassed.

Design implementation can be done through a collaborative process with your team, or as a full turnkey solution.

Upon delivery, we take of end-to-end installation— from site preparation, to hardware/software configuration, and operational QA testing.

12 Point Certification Process

1. Physically inspect all equipment for noticeable damage
2. Port by port diagnostic testing
3. Clean chassis and modules from dust and debris
4. Ensure fans are operational
5. Restore factory default configurations
6. Remove any passwords
7. Live network testing
8. 24-hour stability testing
9. Test all power supplies
10. Verify all serial numbers are valid
11. Verify all chassis are error free
12. Verify all modules and Interfaces are error free

Value-Added Services

Hardware and Software Verification

- Verify full card recognition and performance on the specified IOS.
- Our process utilizes current card build, and we support upgrades to newer revisions if required

Power and Boot Testing

- Power all DC power supplies with -48V
- Power cycle both power supplies 10 times
- Verify that the LED indicators are green and that the chassis boots properly

Extended Burn-In Testing

- Test all cards with specified software version for a minimum of 48 hours
- All equipment receives 24-hour incoming and outgoing inventory testing.
- We employ cyclic power testing during burn-in to ensure long-term reliability

Quality Assurance

- Perform a comprehensive visual inspection per our rigorous QA protocols

Data Center Services

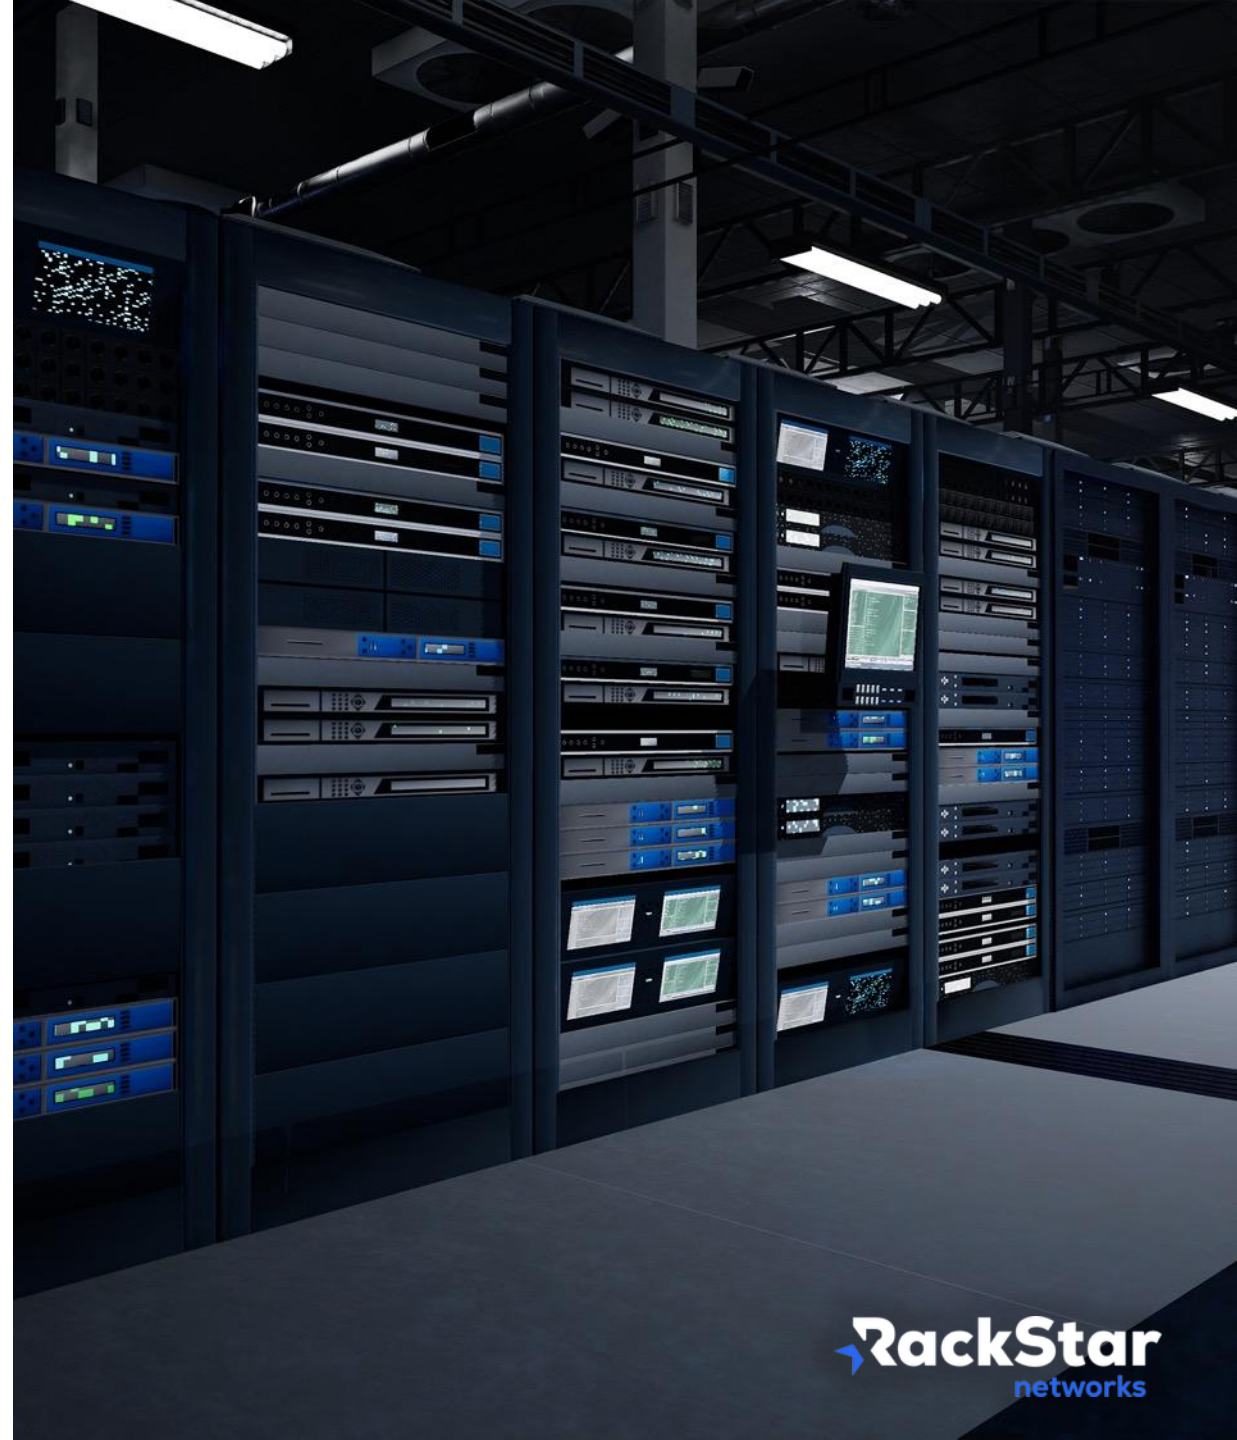

RackStar Networks deploys the most cost effective, power efficient and reliable data center solutions

Service Highlights

- Full equipment procurement (servers, storage, networking, and security)
- Staging, IP/subnet/VLAN configuration, OS/software upgrades
- On-site installation and testing
- End-to-end documentation and labeling
- Ongoing post-deployment support

Key Benefits

- Rapid, multi-location deployment
- Reduced operational disruption
- Seamless vendor interoperability
- Reliable and consistent installation process

Enterprise IT Solutions

Strategic consulting, architecture design, and implementation of core networking and security technologies.

We are vendor-agnostic, focusing solely on crafting solutions that fit your specific goals and budget.

Routing & Switching

- Design and implementation of complex routing configurations
- WAN migration strategies (MPLS, Metro Ethernet, etc.)
- Deployment of 10 & 100 Gigabit Ethernet LANs
- Integration of Fiber Channel over Ethernet solutions
- Server and network load balancing
- Virtual switching technologies

Security

- Network security assessments and solutions
- Implementation of advanced security protocols and appliances
- Integration of security measures within routing and switching infrastructures

Key Benefits

- Optimized configurations for improved efficiency and reliability
- Simplified management of complex network
- Options for new, pre-owned, or hybrid equipment to meet budget constraints
- Focus on maximizing ROI through efficient technology deployment

Comprehensive Wireless Network Solutions

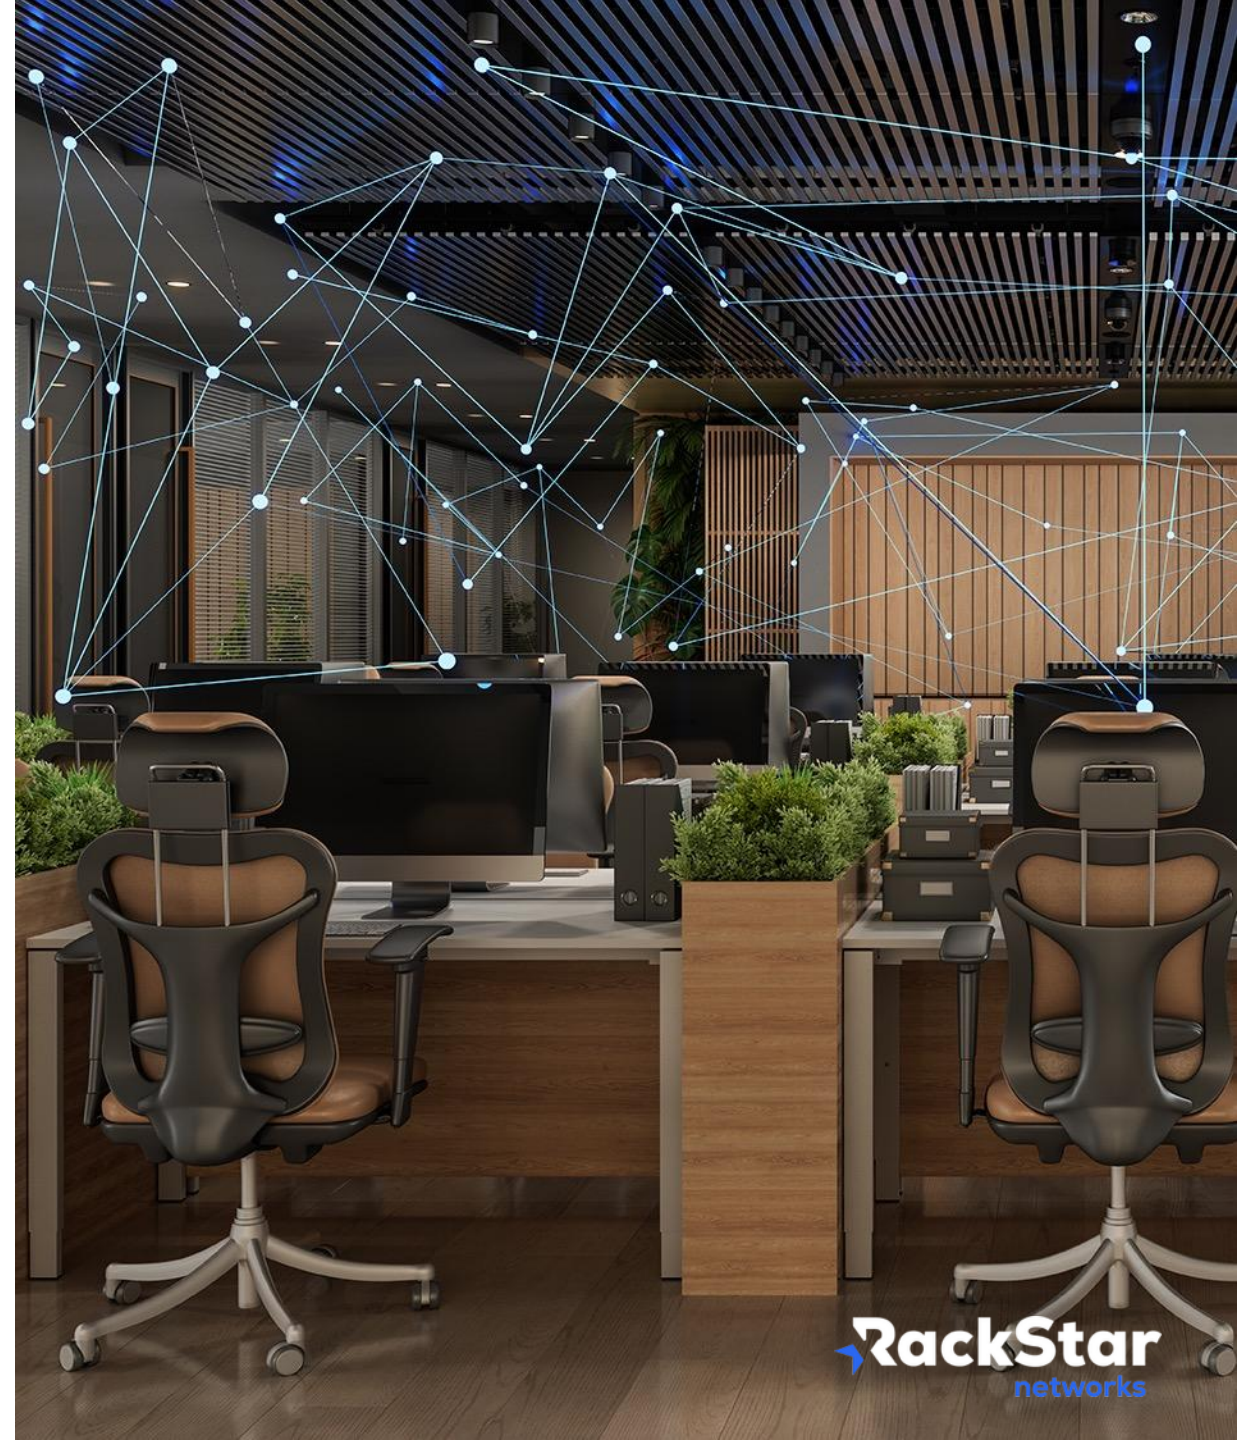

End-to-end wireless services — including RF analysis, predictive modeling, and installation— across all indoor, outdoor, and point-to-point environments.

Service Highlights

- Indoor/Outdoor Wireless Network Design
- Pre- and Post-Installation Site Surveys
- RF Spectrum & Interference Analysis
- Point-to-Point Link Engineering
- Cabling, Hardware Installation & Configuration
- Network Architecture Design & Documentation

Vertical Expertise

- Corporate Offices
- Warehouses & Manufacturing
- Education Campuses
- Government & Healthcare
- Retail & Hospitality

Comprehensive Wireless Network Solutions

Value Delivered.

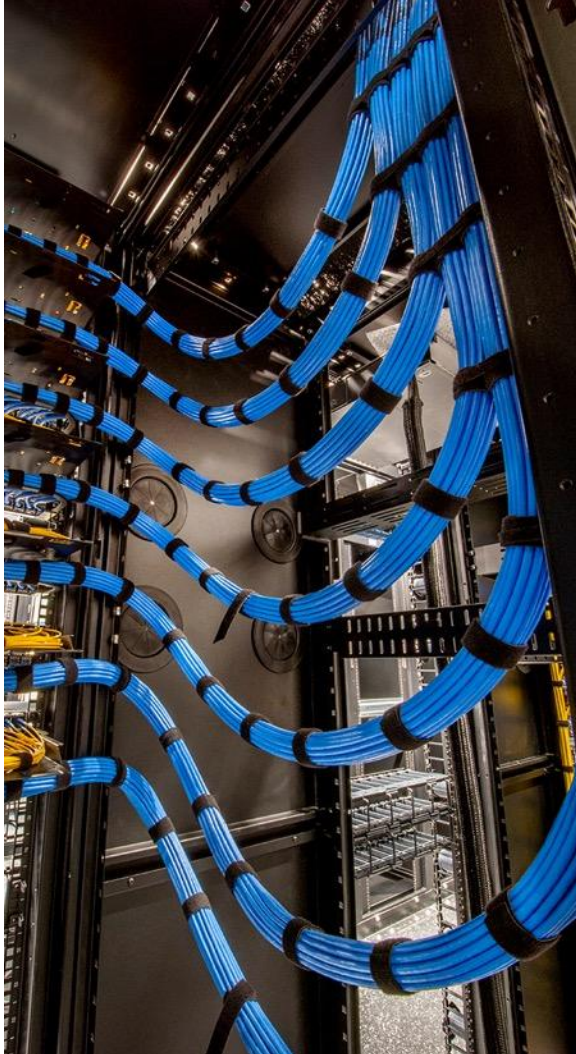

Tailored wireless designs with high signal integrity

802.11 standards-compliant performance validation

Licensed, code-compliant installation crews

90-day post-installation support & manufacturer warranty

Low Voltage Cabling Services

Comprehensive Network Cabling Solutions

- Installation, service, and maintenance of network communications cabling
- Custom patch cords with Corning fiber and hybrid options tailored to specific lengths and connectors

Expertise in Diverse Cabling Systems – Installation & Support

- Voice, Data, and Video cabling
- WAN and LAN infrastructures
- Fiber Optic Distribution Systems
- Category 3, 5, 5e, 6, & 6e applications
- Cable plant reuse and ongoing maintenance

Certified & High-Quality Installations

- Utilization of best-of-breed equipment
- Installations certified to meet or exceed industry standards (TIA, BICSI, ISO/IEC)
- Technicians employ state-of-the-art practices and testing procedures

Consultation & Project Management

- Professional consulting services for Fiber Optic, Copper, Telephone, and Coax cabling
- Project managers oversee cable placement, termination, splicing, and testing

Planning to Performance – Wireless Done Right

Discovery & Planning

- Pre-Install Site Surveys to assess RF conditions
- Heatmap-based predictive modeling & AP placement
- Full project documentation & hardware labeling

Installation & Validation

- Certified low-voltage and electrical contractors
- Aesthetic, building-code-compliant installs
- Post-Install Surveys and Performance

Hardware Options

- Onsite or Lab-Based Configuration
- “Configure & Ship” with full documentation (SNs, IPs, credentials)
- Point-to-Point wireless bridging with RF

Key Benefits

- Reduced RF interference and signal loss
- Faster deployment timelines with minimal disruption
- Scalable architecture aligned to business growth
- Procurement (servers, storage, networking, and security)
- Staging, IP/subnet/VLAN configuration, OS/software upgrades
- On-site installation and testing
- End-to-end documentation and labeling
- Ongoing post-deployment support

Comprehensive Support Programs

- Maximize ROI by extending the lifespan of your network assets with **new and certified pre-owned equipment**
- All items undergo **48 hours of testing** — 24 hours incoming, 24 hours outgoing — to ensure reliability
- Flexible **1-, 3-, or 5-year warranties**, with advanced replacement and next-day delivery based on availability
- Enjoy **8x5xNext Business Day support** from technicians
- Get **lifetime support** even for OEM End-of-Life products
- Maintains a **global inventory** of replacement hardware for fast fulfillment and minimal downtime

Operational Excellence

- Over 5 million dollars on hand inventory
- Surveillance system with 24-hour monitoring
- Shipping & Receiving (8am-6pm PST, 24-hour response time). DHL, Fed Ex, & UPS all within 1/4 mile.
- Deep market insight, we know how to buy, sell, and trade technology for maximum ROI.
- Certified technicians on staff to properly test all outgoing & incoming shipments. Fully configure all products-power, port testing, soak, packet, network build.
- Lab test bed for multiple manufactures: Arista, Cisco, Dell, HP, Juniper, etc.

Hybrid Value-Added Reseller (VAR)

HYBRID VAR ADVANTAGE

We're a hybrid VAR—mixing new and pre-owned gear from top OEMs to give you maximum flexibility, without the trade-offs.

MAXIMIZED ROI

Top-tier solutions that push your IT budget further—without sacrificing performance, scalability, or long-term value.

STRATEGIC SOURCING

We tap both OEM channels and the open market to move faster, price smarter, and keep inventory ready when you need it.

CERTIFIED PARTNERSHIPS

Powered by top brands like Arista, Barracuda, Fortinet, and Ruckus—delivering quality gear, sharp expertise, and support you can count on.

Partner for Success

RackStar Advantage: Real Solutions. Real Support. Real Results.

RackStar Networks helps organizations grow profits, control costs, and minimize risk with smart IT infrastructure solutions, flexible sourcing, and expert support.

From blueprint to buildout to long-term support, we deliver full-lifecycle tech solutions that keep your environment lean, scalable, and ready for what's next.

We blend new and pre-owned equipment with hands-on expertise to power smarter IT, higher productivity, and ROI that actually shows up on your bottom line.

Appendix

New & Used Hardware

Service Highlights

- Enterprise networking, compute, storage, and security solutions
- Hybrid VAR sourcing model
- Arista, Cisco, Juniper, Dell, HPE, Supermicro, Nokia, and more
- Rapid fulfillment and global logistics
- Cost savings up to 85% off OEM list pricing

Equipment Buy Back

Service Highlights

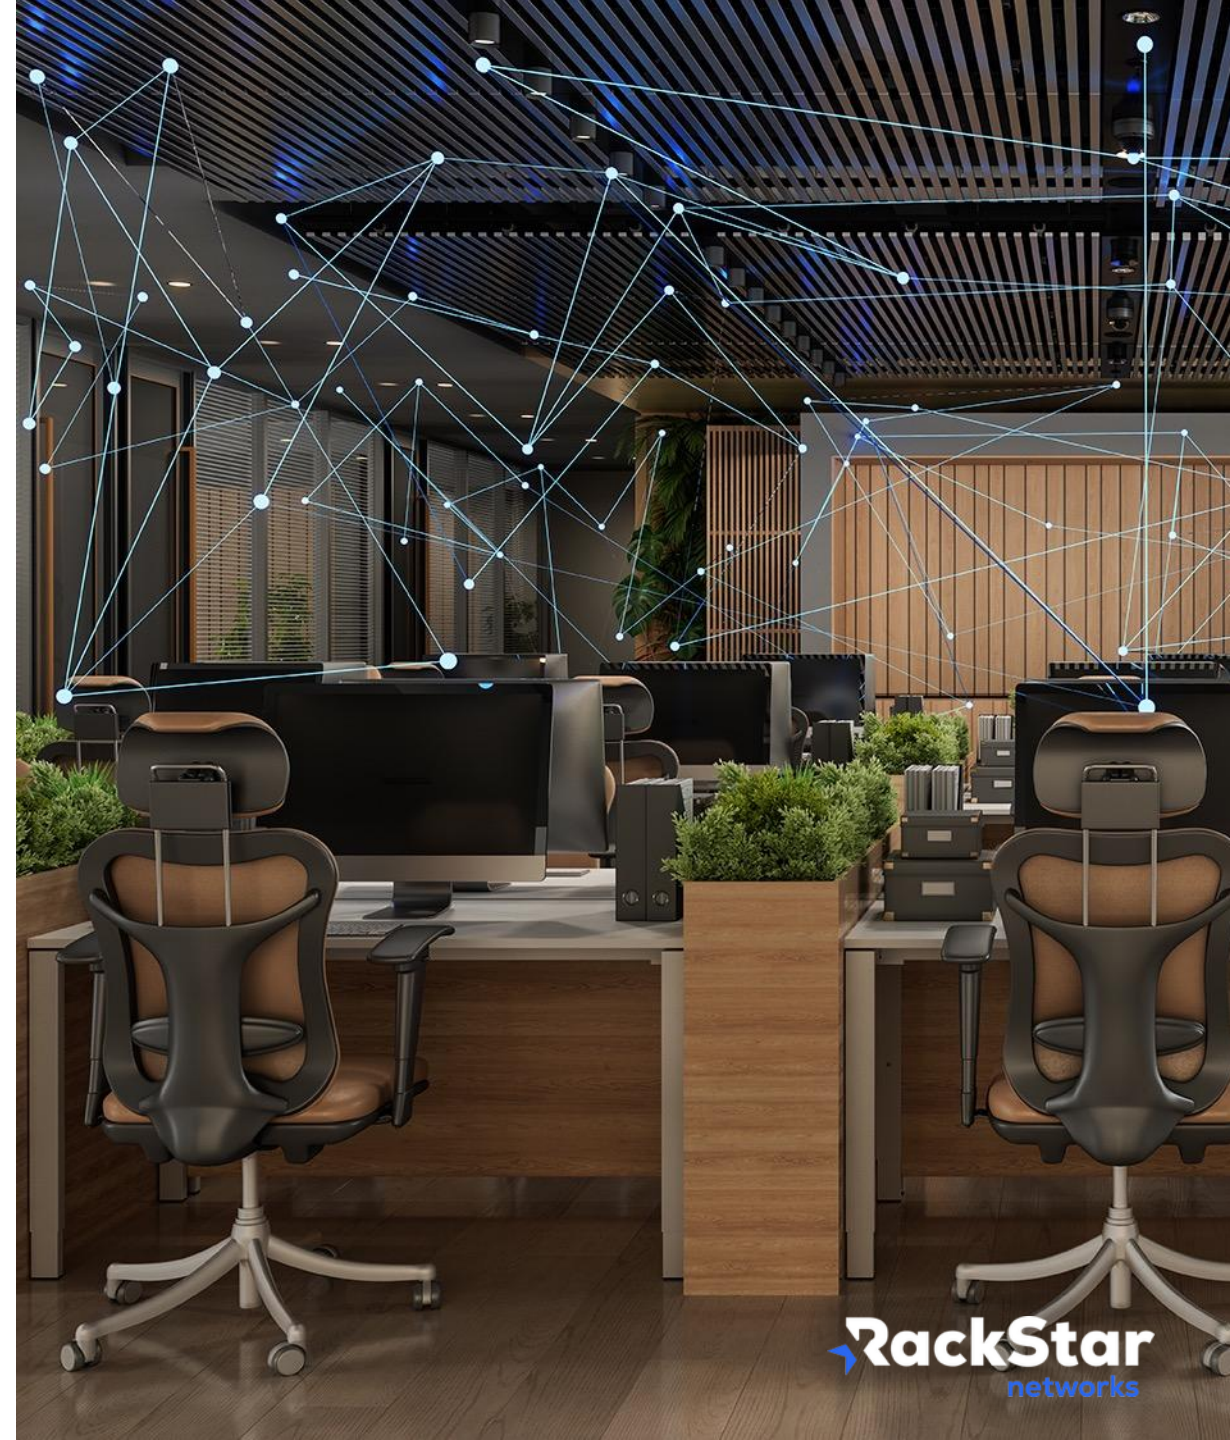

- IT asset recovery and surplus equipment purchasing
- Trade-in and upgrade programs
- Secure decommissioning and inventory evaluation
- Fast turnaround valuations and flexible logistics coordination

Wireless & Structured Cabling

Service Highlights

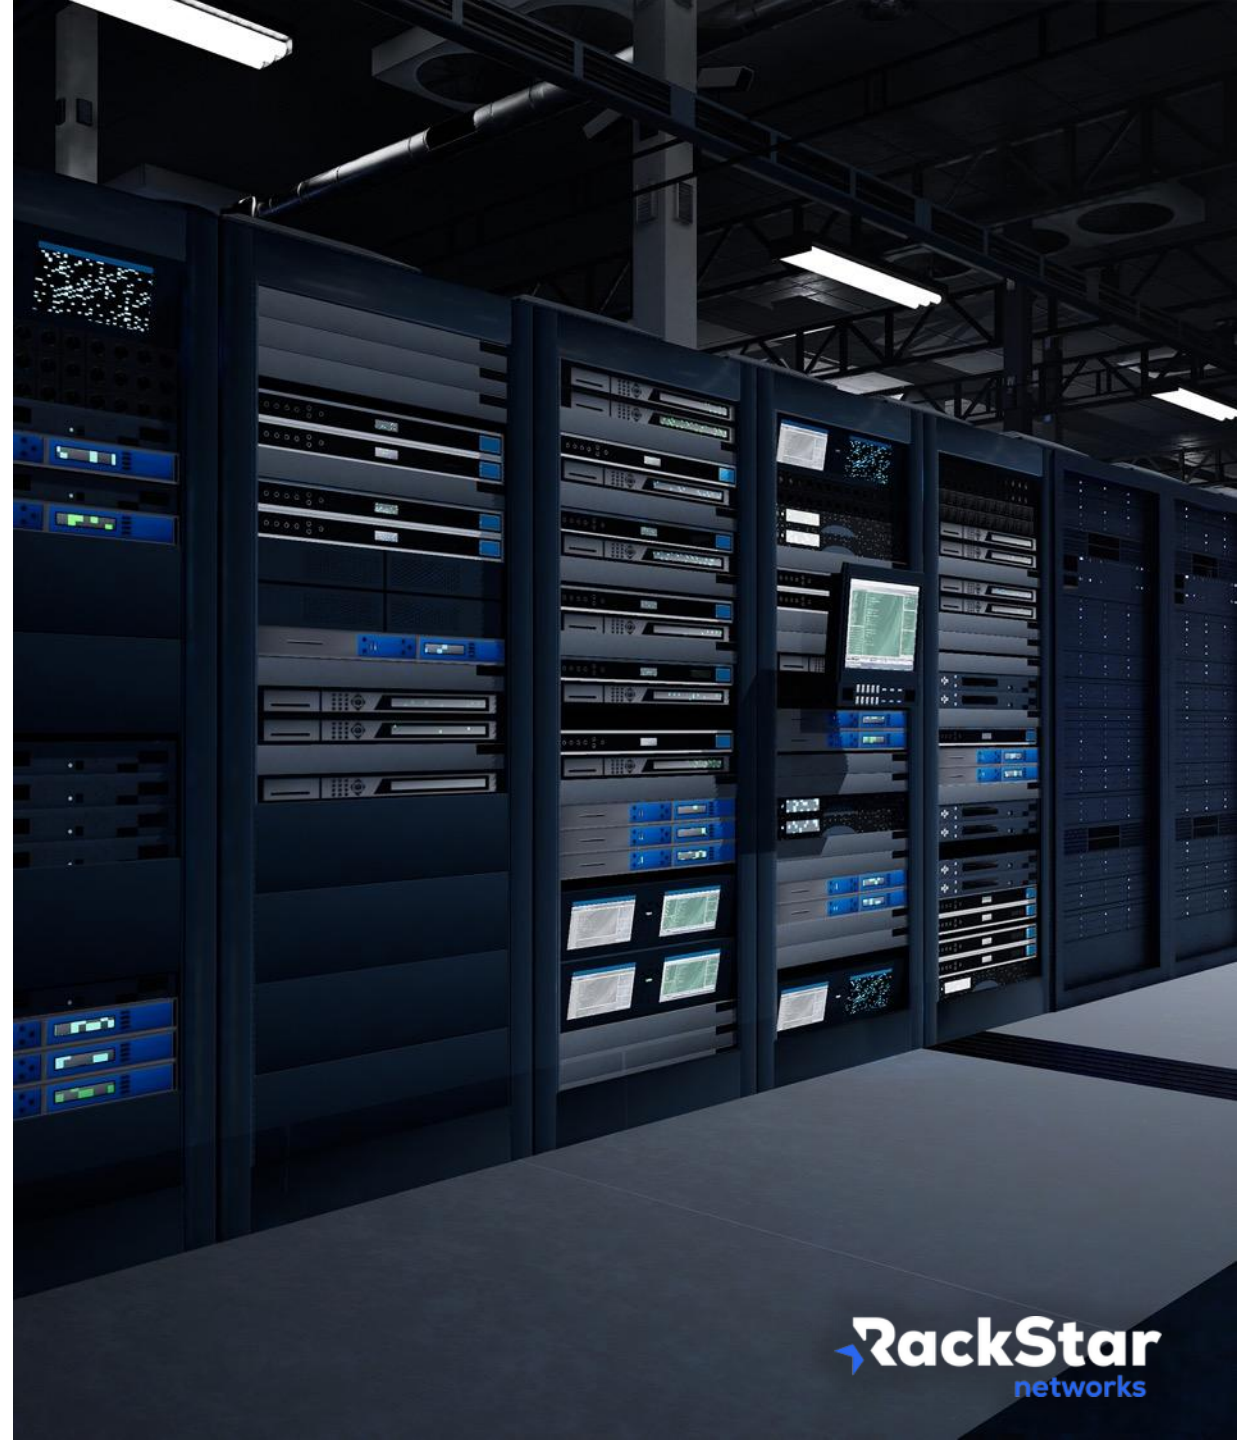

- Wireless site surveys and predictive heatmapping
- Indoor/outdoor wireless deployments
- Fiber, copper, and low-voltage cabling
- Point-to-point wireless solutions
- Certified installation and remediation services

Data Center Installation & Decommissioning

Service Highlights

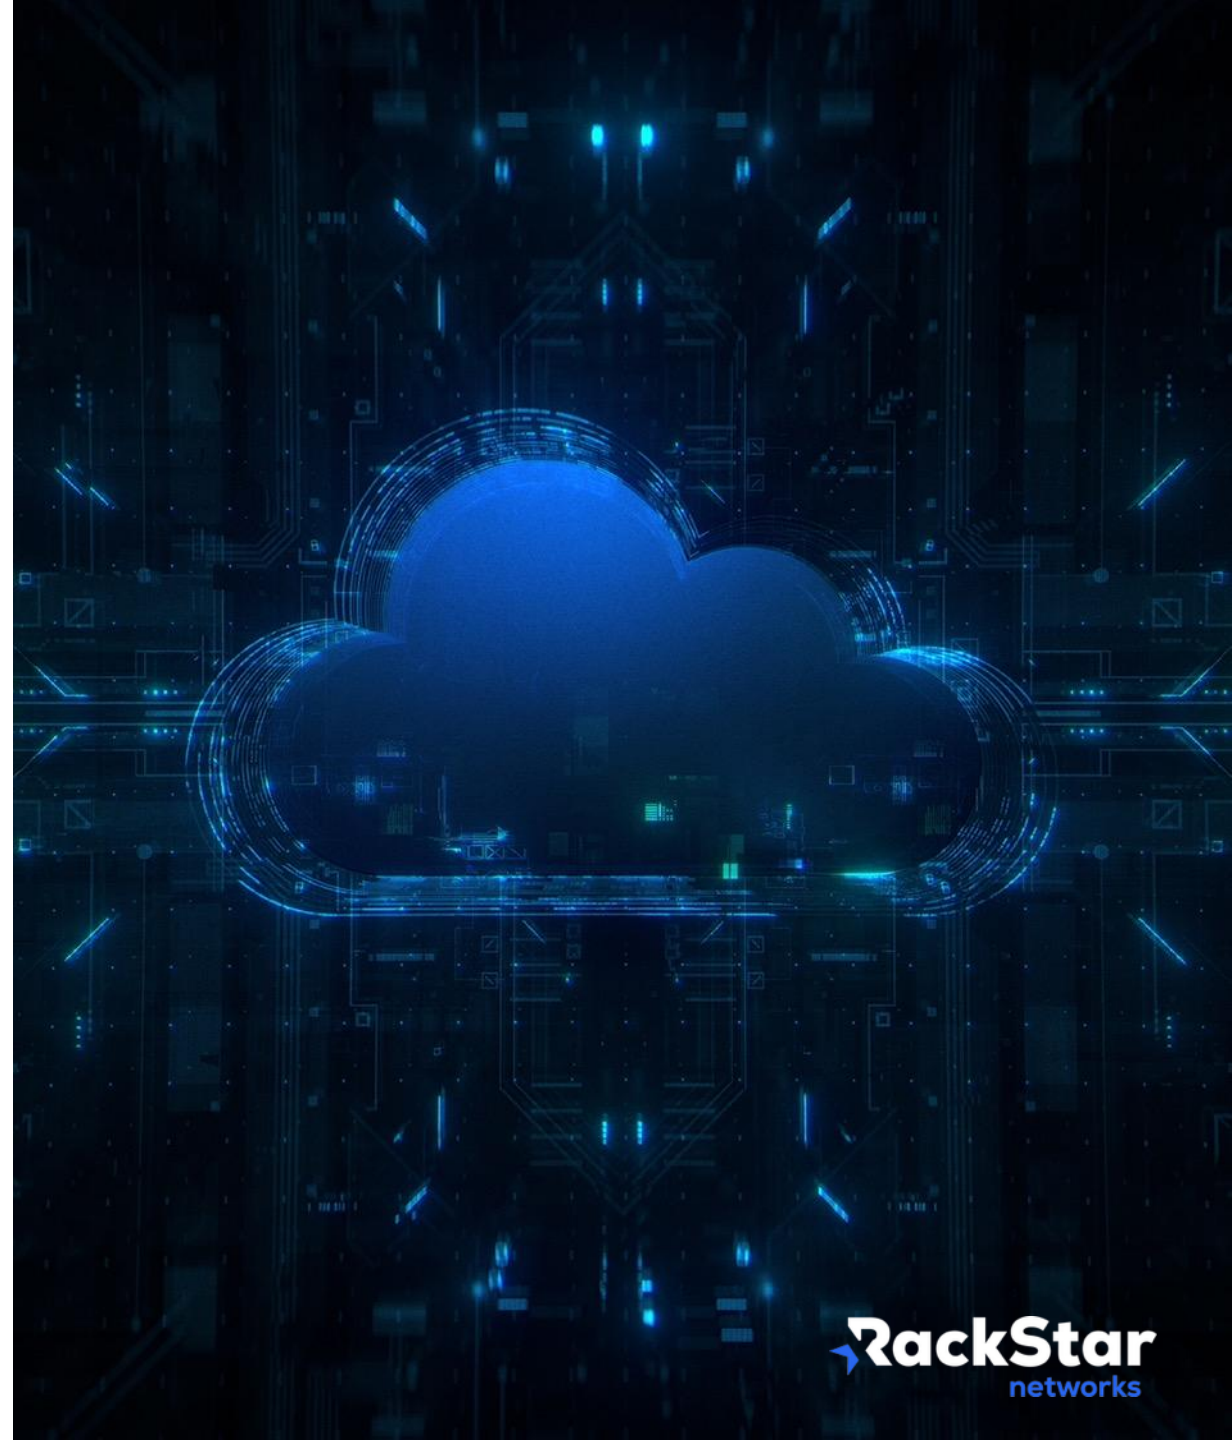

- Rack-and-stack deployments
- Hardware staging and configuration
- Smart hands and migration services
- Asset tagging, labeling, and documentation
- Secure decommissioning and disposal coordination

SaaS & Cloud Services

Service Highlights

- Cloud infrastructure and hybrid IT solutions
- Microsoft 365, AWS, backup, and disaster recovery
- Security and SASE solutions
- UCaaS and collaboration platforms
- Vendor-agnostic consulting and architecture support

Testing & Warranty

Service Highlights

- Multi-point certification and burn-in testing
- Port, power supply, and operational validation
- Hardware and software verification
- 1-, 3-, and 5-year warranty options
- Advanced replacement and technical support services

Comprehensive IT Solutions and Expertise

Customized solutions for your Data Center, lab, LAN, and WAN, designed to maximize your technology and give you a competitive advantage

A full range of professional services tailored to meet the unique needs of your organization.

MCSE & General IT

Wireless Design, Remediation & Deployment

Routing & Switching Expertise

Low Voltage Cabling & Fiber Specialist

Data Center Install & Decommissioning

WAN Switching

Mission

RackStar Networks delivers high-performance IT solutions fast, affordable, and built to keep your business moving.

Vision

To become the go-to partner for smart, cost-effective IT infrastructure powering businesses to move faster, scale confidently, and stay ahead.

Planning to Performance – Wireless Done Right

Key Benefits.

Rapid, multi-location deployment

Reduced operational disruption

Seamless vendor interoperability

Reliable and consistent installation process

Key Differentiators

Experience & Proximity

- 50+ years of real-world networking experience
- Born in Silicon Valley, home of the tech giants
- No vendor bias, no fluff

Inventory & Pricing Advantage

- New or pre-owned—we've got options
- Save up to 85% off retail
- Racks on racks of RackStar-certified gear—Arista, Cisco, Juniper, and powerhouse servers from Dell, HPE, and Supermicro.
- In stock. Ready to ship. No waiting around.

Smart, Friendly People who Actually Pick up the Phone.

- Real people. Real support. We show up, solve problems, and build partnerships that last.

Technology Partnership & Transparency

- State-of-the-art hardware, no compromises. We partner with the best—period.
- No smoke and mirrors—walk the floor, see the inventory, and watch our test lab do its thing

Clear Vision of Market Need

- We know our customers. We know the tech and we know how to bring it all together seamlessly.
