

SaaS & Cloud Solutions

RackStar Networks goes beyond hardware delivering a powerful portfolio of Software-as-a-Service (SaaS), cloud, and connectivity solutions designed to keep your business agile, secure, and always connected. From productivity tools to advanced security and AI-driven customer experience platforms, we bring together best-in-class providers to simplify your IT stack and accelerate growth.

Our SaaS offerings include:

Productivity & Collaboration

Microsoft 365 and cloud-based workplace solutions

Cloud Infrastructure

AWS, Acronis, and leading global data center providers

Connectivity & Colocation

Scalable networking, SD-WAN, and global interconnect solutions

Security & SASE

End-to-end protection with industry leaders like Fortinet, Palo Alto Networks, and Cloudflare

UCaaS & CCaaS

Unified communications and contact center platforms (Zoom, RingCentral, 8x8)

CX & AI

Intelligent automation, analytics, and customer engagement tools

We partner with top-tier providers across every category to deliver flexible, vendor-agnostic solutions tailored to your environment and budget

Why RackStar SaaS?

- One partner for cloud, connectivity, and security
- Flexible, scalable solutions with no vendor lock-in
- Expert guidance from design through deployment
- Built for performance, cost-efficiency, and growth
