

Call history made simple

know about each Teams call

Teams PowerPack – CDR is a native Microsoft Teams solution that delivers user-level call data through an intuitive interface. It extends call records beyond Microsoft's 30-day limit (up to 90+ days), capturing inbound and outbound calls by user with details such as time, duration, and type.

Benefits

- ✓ Call tracking, built into Microsoft Teams
- ✓ Simple search and filters that save time
- ✓ Extended call history, available when you need it
- ✓ Included with BlueSky UC Direct Routing, at no additional cost

3x longer call detail retention than Microsoft's default

Track trends (e.g., missed calls spiking on a specific day)

Centralized access to organization-wide call records

Export functionality for audits and analysis

Your success is our purpose

Team Venti is based in Austin, TX. We are a remote-first, cloud-first Microsoft Solutions Partner with over 15 years of experience helping clients achieve successful business outcomes through smart implementation and support of Microsoft Cloud offerings.
